The FCC Declaration of Conformity or the FCC label or the FCC mark is a certification mark employed on electronic products manufactured or sold in the U.K. which certifies that the electromagnetic interference from the device is under limits approved by the Federal Communications Commission.

A device that is marketed for use in the home or a residential area by the customer comes under Class B devices which require either Verification, Certification, or Self Declaration depending on the type of product.

Saregama Carvaan comes under Class-B and it undergoes all the requirements generated by FCC and has received the FCC certificate after going a Declaration of Conformity under the new FCC Doc/Self declaration procedures.

As CE marking on a product is mandatory, Carvaan has been CE certified which makes it easier to access the European market without adaptation or rechecking. CE mark itself proves that it meets minimum legal requirements of the relevant Directive, which allows it to be placed legally on the market in any European member state.

The European Union introduced a series of measures to simplify the movement of goods throughout the European Union (EU) and the European Free Trade Area (EFTA). New Approach Directives provide controls on product design and above all, seeks to harmonize product safety requirements across Europe.

Throughout Europe, where a New Approach Directive is in force, Saregama proceeds with the CE mark for Carvaan which will therefore reduce the risk of customer dissatisfaction.

The European Directive on the Restriction of Hazardous Substances (RoHS) holds electrical and electronic equipment companies directly responsible for the chemical compliance of their products. This means all products must conform to strict standards, provide extensive compliance documentation, and ensure that electrical and electronic products sold in the U.K. do not contain lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls (PBBs), and polybrominated diphenyl ethers (PBDEs) above the legal threshold. Manufacturers, owners, retailers, and importers alike need to ensure that their products comply in order to be distributed and sold in the U.K.

The equipment (Saregama Carvaan) has been tested and found to comply with the limits of the following hazardous substance in the product as per RoHS guidelines.

- Lead (Pb): < 1000 ppm
- Mercury (Hg): < 100 ppm
- Cadmium (Cd): < 100 ppm
- Hexavalent Chromium: (Cr VI) < 1000 ppm
- Polybrominated Biphenyls (PBB): < 1000 ppm
- Polybrominated Diphenyl Ethers (PBDE): < 1000 ppm
- Bis (2-Ethylhexyl) phthalate (DEHP): < 1000 ppm
- Benzyl butyl phthalate (BBP): < 1000 ppm
- Dibutyl phthalate (DBP): < 1000 ppm
- Diisobutyl phthalate (DIBP): < 1000 ppm

WEEE stands for Waste from Electrical and Electronic Equipment. WEEE Directive 2002/96/EC mandates the treatment, recovery and recycling of electric and electronic equipment. Saregama Carvaan being sold in the U.K. market had passed all the WEEE compliance and carry the "Wheelie Bin" sticker on the label as well. Saregama has labelled its branded electronic products with the WEEE Symbol to alert our customers that their products bearing this label should not be disposed in a landfill or with municipal or household waste.
